Sixth Annual Spring Concert Set For Wednesday at North High Gym

The Sixth Annual Spring Music Festival presented by the North High School Department of music will be given Wednesday, April 26th at 8 p.m. in the North High Gymnasium.

The program opens with the mixed chorus, directed by Mr. Frank Small, singing "Some Folks Do," "Water Boy," Adoramus Te," and "One Little Candle."

The Saxon Orchestra follows with three classical numbers entitled "Divertimento," "Aria: Marriage of Figaro," and "Russian Choral and Overture." The orchestra is directed by Robert Jones.

"TEA FOR TWO," "Somebody Loves Me," and "I Feel Pretty" by the Girls' Glee Club under the baton of Mrs. Marilyn Steele lend a popular touch to the program.

The Saxon Concert Band, directed by Jones will play "Slavonic Dances" and "Light Cavalry Overture." Glenn Keohane will be featured as trumpet soloist in Harry James' "Trumpet Rhapsody," while a flute quintet of Linda Hileman, Linda Kirkpatrick, Janet D'Aloia, Jeanne Kurz, and Yolanda Hanson will be soloists in the "Penny-Whistle Song" by Leroy Anderson.

of the old standards including "I Love A Parade," "Over the Rainbow," "Stardust," and "Begin The Beguine."

The program will conclude with all groups performing the "Festival Finale" by Maddy. This number will be directed by Jones.

Spreading Basin In Lomita Area Given Approval

The County Board of Supervisors, has approved the location and extent of right of way for the proposed Lomita Spreading Basin in the City of Rolling Hills, the office of Supervisor Burton W. Chace disclosed today.

Involving about 60 acres, the site is located between Narbonne Ave. and Pennsylvania Drive and lies north of 262nd St.

The properties are presently owned by the Chandler Palos Verdes Sand and Gravel Co., Edward Sidebotham and Son, Inc., and the Getty Oil Co., the Supervisor's office said.

APPROVAL of the location in the right of way involved is a prelude to negotiations for the acquisition of the properties by the County Flood Control District.

The District hopes to eventually develop spreading facilities in the area where water can be percolated into the underground water table as a conservation measure, Chace's office said.

Because of the sand and gravel composition of the soil, it is particularly adaptable to this type of operation, the office pointed out.

Importance of the conservation program by the District is pointed up by the fact that the County obtains about 50 per cent of its water supply from underground wells supply. Supervisor Chace's office added.
